## TECHNICAL SKILLS

---

**Proficient:** JavaScript, Node, React, Redux, Express, Sequelize, PostgreSQL, Git, HTML5, CSS3, Sass

**Knowledgeable:** React Native, React Query, Tailwind CSS, Styled Components

## PROJECTS

---

**Okidoki** | *Fullstack Developer* | [Github](#)

June – July 2022

A mobile health app that gamifies fitness by encouraging players to meet daily step goals in order to care for their virtual pet. Built with React Native and integrated with Apple HealthKit.

- Set up authentication with JSON Web Tokens, Bcrypt and SecureStore
- Implemented ability to use items and increment mood with React Query hooks
- Built and styled app with Styled Components and React Native Paper

## EXPERIENCE

---

**Memorial Sloan Kettering Cancer Center**

Sept 2019 – Apr 2022

*Web Producer*

*New York, NY*

- Spearheaded creation of intranet sites for wide-reaching initiatives to inform leadership, provide resources to 20,500+ employees, and encourage collaboration across departments
- Built webpages using HTML, CSS, and JavaScript
- Migrated 5 major departmental sites and 600+ site pages to SharePoint Online by organizing content, creating wireframes, building webpages, and mentoring 5 colleagues each month
- Started and maintained internal site with biweekly articles to inform on data projects across the company, growing readership to 400+ per article and mailing list to 1,100+ since inception
- Built new features in legacy code in Angular for employees to submit projects through a custom form and vote on 80+ projects in annual Quality Improvement Fair

**The Bowery Mission**

Nov 2017 – Dec 2018

*Digital Development Coordinator*

*New York, NY*

- Led website overhaul of bowery.org by building 100+ responsive webpages and liaising with external developers to add and debug features in the content management system
- Built out pages biweekly for testimonies and donations on bowery.org and grmnewark.org using HTML, CSS, and Foundation in order to cultivate a relationship with donors and volunteers
- Designed, coded, and debugged 10+ emails sent to 40,000+ recipients every month

**Quantum Logic Corporation**

June – Aug 2015

*Front End Web Developer Intern*

*New York, NY*

- Built 21 websites for stock indexes managed by client, S-Network Global Indexes, with HTML and CSS, within a proprietary content management system
- Isolated bugs and planned new features, assuring quality of in-house CMS with backend team
- Coded and tested prototypes for site pages to meet client needs and specifications

## EDUCATION

---

**Grace Hopper Coding Bootcamp at Fullstack Academy**

Mar – July 2022

17-week immersive software engineering program centered on full-stack JavaScript development

**Villanova University**

May 2016

Bachelor of Science in Computer Science
